## OPEN SCIENCE COMPLIANCE FORM

### Absence of Conflicts of Interest

The authors declare that there are no conflicts of interest of a personal, commercial, academic, political, and/or financial nature in the process of evaluation and publication of the aforementioned article.

### Responsibility for Originality

The authors certify that the article represents original work and that neither this manuscript, in part or in whole, nor any other work with substantially similar content by the authors has been published or is being considered for publication in another journal, whether in print or electronic format.

### Transfer of Copyright

The authors declare that they transfer the copyright pertaining to them to the **Centro Universitário São Camilo** for publication in a scientific journal in both print and electronic versions. Therefore, any total or partial reproduction in any other medium or form of printed or electronic dissemination is prohibited without prior authorization from the **Centro Universitário São Camilo-SP**. As this is the unanimous expression of their will, the authors declare that they authorize the use described below without any claims regarding related rights to image or intellectual material.

## OPEN SCIENCE COMPLIANCE FORM

### Transfer of Copyright

1. By means of this document, the authors authorize the use of promotional material, allowing the Educational Institution to reproduce or disseminate the images obtained on social media platforms (*Facebook, LinkedIn, Twitter, Instagram, TikTok*, and others that may be used), electronic newsletters, the institutional website, PowerPoint presentations, printed promotional materials (flyers, banners, posters, advertisements, among others), digital materials (videos, email marketing, electronic banners), and other related communication channels.
2. They declare that they are aware that their image may be published in digital/internet and physical materials without any cost, and that there is no employment or labor relationship between the author and the **Centro Universitário São Camilo-SP**.
3. They also declare that they are aware that their image and voice are personal data, and the **Centro Universitário São Camilo** will process their personal data in accordance with Law 13.709/18, the General Data Protection Law (LGPD), for the purposes described in this authorization form.
4. Through this document, they freely, informedly, unequivocally, and specifically consent to the processing of their personal data. They further declare that they are aware that they may revoke this authorization at any time through a formal request submitted to the **Data Protection Officer** via email at [dpo@saocamilo.br](mailto:dpo@saocamilo.br)
5. Any image records will be retained until the authorization is revoked or for longer periods in compliance with legal or regulatory obligations or for defense in judicial, administrative, or arbitration proceedings.

### Declaration on the Use of Artificial Intelligence (AI) Tools

1. Through this document, the authors explicitly declare that, in the event of using AI tools, such use was conducted with transparency, responsibility, and ethical rigor.
2. The authors declare that they are aware that AI tools must not be listed as authors of manuscripts submitted to the journal *O Mundo da Saúde*, and that scientific authorship presupposes intellectual, ethical, and legal responsibility—attributes that cannot be assumed by automated systems.
3. They further declare that the use of AI must be described in an ethical and accurate manner, making clear that all conceptual decisions, interpretations, and conclusions remain entirely under the responsibility of the authors.
4. Through this statement, the authors consent that when textual or visual content is entirely generated by an AI tool, and not merely revised or edited, such use must be duly cited in the reference list or figure caption.
5. With regard to ethical responsibility, the authors acknowledge that content produced with the assistance of AI must be carefully reviewed to ensure scientific accuracy, originality, absence of bias, and ethical compliance. They also understand that the submission of AI-generated information without verification or without declaration of its use may be considered scientific misconduct and may result in rejection or retraction of the article.
